AMORPHOUS: A Career in Art Glass

August 22 - September 29, 2022

Glassblowing is a glass forming technique which was invented by the Syrian craftsman in the 1st century BCE. Glass exists as sand-like powder, a dripping, molten taffy, and hard/sharp if shattered. The ability to be many different things can be a strength, and such is true for many working artists as well. David Smallhouse, a former Vietnam veteran, led a full career as a glass artist for over 3 decades. His interests in color, form, tradition, function, nature, and abstraction are illustrated in this selection from his personal collection.

Artist's Reception September 27th 2-4pm
with music provided by Butte College Music Department!
